ABOUT ME

I am a Civil Engineering undergraduate at the University of Peradeniya with a strong interest in structural design, Building Information Modelling (BIM), and digital construction workflows. I am developing my Revit modelling skills and learning Python and Microsoft Excel to support engineering calculations, data handling, and more efficient civil engineering workflows. I enjoy solving practical problems, working in teams, and communicating technical ideas clearly.

EDUCATION

University of Peradeniya
B.Sc. (Hons) in Civil Engineering (UG)

President's College, Embilipitiya
G.C.E. Advanced Level — Physical Science Stream

Advanced Level Results

Combined Mathematics	A
Physics	A
Chemistry	A

TECHNICAL SKILLS

Revit — Building modelling practice
AutoCAD — 2D drafting practice
Python — Learning programming for engineering problem-solving
Microsoft Excel — Learning spreadsheets for engineering calculations and data organisation

CORE SKILLS

Leadership • Teamwork • Communication • Practical problem-solving • Time management

LANGUAGES

Sinhala
English

PROJECTS & EXPERIENCE

Arduino Line-Following Robot
University of Peradeniya · 2026

Worked on an Arduino-based line-following robot and a computing solution for a university operational problem. Applied technical analysis, programming, teamwork, and practical problem-solving.

Technical Presenter & Exhibitor — EngEx 2025
University of Peradeniya · 2025

Explained the operating principles of High-Performance Liquid Chromatography (HPLC) to exhibition visitors and students, building experience in technical communication and public speaking.

School Prefect & Student Leader
Royal College, Embilipitiya · 2018–2020

Supported student leadership and discipline and completed a National Centre for Leadership Development programme for school prefects. Developed coordination, responsibility, and teamwork skills.

ACHIEVEMENTS & ACTIVITIES

- Art competition participation and certificates
- Leadership development training for school prefects

CAREER INTERESTS

Civil Engineering
BIM / Revit Modelling
2D-to-3D Building Modelling
Structural Design

ADDITIONAL INFORMATION

Interested in applying digital tools to practical civil engineering tasks, including modelling, calculations, and technical documentation.
